WELCOME !

So, here we go again! Welcome to another dimension of ATARI partying!

However this time it's not just a slogan... but a **REALITY!** It's surely one of my **Silliest Ventures** ever in history, and reaching the sky with **ATARI's 50th** takes literal meaning now! **Ladies and Gentlemen... Gentlemen and Ladies...** Yes, you read it right - it's already **50 (!)** years since the date the **ATARI** company was originally incorporated, so **let's celebrate it the right way!**

From **August 12 to August 14**, we meet... on the last, **34th floor of the highest-located conference room in Poland - "Olivia Star"**! It is a skyscraper, one of the most modern high-rise buildings in Poland, completed in 2018 - **100 meters high** (156 meters is the highest point of the facade!). We will take you up towards the stars! The view from the observation deck **literally knocks you off your feet!**

In addition, you can expect:

- a great sound system
- amazing screen for the visual compo entries
- perfect internet/WiFi

...as well as good and inexpensive restaurants!

So yes, you are totally right - **I lost my mind!** But we only live once. Because **WHEN**, if not **NOW?** I doubt I will live to see another **Atari 50th birthday**, although of course I would love to. Therefore, as **never before**, I need your support! Let **each of you** contribute to this unique event **as only you can!**

Remote entries are welcome of course.

I want to believe that the event will be a success and we will meet **4 months** later at the winter edition... Not knowing the answer to this question today, I would like to tell you right now - it was **WORTH IT!** Throughout all these years! Because the **ATARI** community is unique, as are all our memories related to it :) But if it fails, it's hard to imagine an **ATARI** half-century with more bang than this, right?

"I reach the sky just for a while

Am I a part of this space?

I reach the sky just for a while

Motionless universe

I see planets over my head

I reach the sky

Over my head, over my head

Stars collide..."

(c) "Reaching The Sky" by AnVision

So reach for the sky with us, guys! cause tomorrow may never come...
